

April 22, 2021

Good morning,

I message you on behalf of our Leadership team to share awareness and information relating to confirmed COVID-19 cases in Residence 41 and Residence 46 @ Aspen Village.

We confirm that two staff members of the Robin Hood Association worked shifts without breach of our PPE protocols in these homes during the incubation period before symptoms. RHA has received written confirmation of the Outbreak status from AHS which, unless further individuals test positive in the locations, will conclude May 13, 2021. Staff and families who have been in contact with a positive case have been notified. If you have not been identified by our team and as a precaution would like to seek out a test, you are welcome to do so but this is not mandated. RHA has scheduled a single site staff designation exclusively for Residence 41 & Residence 46 for the duration of the outbreak.

We (staff and families) must ensure that we pay close attention to our health indicators and isolate immediately if symptoms of COVID-19 present themselves. Your efforts and diligence to existing protocols along with these enhanced processes are crucial to protect folks in service, our colleagues, and our families.

Be well,

Ben King

He/Him

Director, Adult Services
